

VIVEK SINGH

Full Stack Developer | MERN Stack · Next.js · Node.js

Dehradun, Uttarakhand | vivekrawat08wrk@gmail.com | +91-8077714510

linkedin.com/in/05viveksingh | github.com/vivek08wrk

SUMMARY

Full Stack Developer experienced in building and deploying end-to-end web applications with the MERN stack and Next.js. Solid fundamentals in REST APIs, authentication, and databases, plus practical experience with Docker and AWS deployment.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React, Next.js (App Router), Tailwind CSS, Shadcn UI, Material UI, Bootstrap

Backend: Node.js, Express, RESTful APIs, Microservices Architecture, Socket.IO

Databases: PostgreSQL, Prisma ORM, MongoDB, Mongoose, Redis, Firebase, Firestore, SQL

Cloud & DevOps: AWS EC2, AWS RDS, Docker, Docker Compose, Cloudflare R2, Cloudflare Tunnel, Nginx, Vercel, Render

Tools & Others: Git, GitHub, Stripe API, JWT, Bcrypt, Cloudinary, Axios, Authentication & Authorization, State Management, Responsive Design

PROJECTS

SkillSphere – Online Learning Platform

GitHub: github.com/vivek08wrk/SkillSphere | Live: skill-sphere-eta.vercel.app

Tech Stack: Node.js, Next.js 14, PostgreSQL, Prisma ORM, Redis, Docker, AWS EC2, AWS RDS, Stripe, JWT, Vercel

- Designed and deployed a microservices architecture with 5 independently containerized services (Auth, User, Course, Payment, Notification) on AWS EC2 using Docker Compose, routed through a centralized API Gateway.
- Implemented asynchronous event-driven communication using Redis Pub/Sub, decoupling the Payment and Course services to trigger enrollment automatically without direct service dependency.
- Integrated the Stripe payment gateway with webhook verification to securely handle payment lifecycle events and ensure a reliable enrollment flow on transaction success.
- Configured AWS RDS (PostgreSQL) for persistent storage and Cloudflare Tunnel to securely expose the backend over HTTPS.

Profly – Photo Proofing Platform

GitHub: github.com/vivek08wrk/profly | Live: profly-two.vercel.app

Tech Stack: Next.js, TypeScript, React, Redux Toolkit, Socket.IO, Node.js, Express, MongoDB, Cloudflare R2, Sharp

- Built a full-stack photo proofing platform using a Next.js (TypeScript) frontend and an Express (TypeScript) API backend, enabling photographers to create client projects, share public gallery links, and track selections in real time.
- Implemented direct browser-to-Cloudflare R2 uploads using presigned URLs, with server-side image processing and optimized preview generation via Sharp.
- Built a public client gallery with a masonry layout and lightbox viewing, using Socket.IO to sync live upload progress and selection updates between photographers and clients.
- Developed CSV and ZIP export routes for client-selected photos, securing all photographer routes with JWT-based authentication.

CineBharat – Full-Stack Movie Booking Platform

GitHub: github.com/vivek08wrk/CineBharat | Live: cine-bharat.vercel.app

Tech Stack: MERN Stack, React 19, Tailwind CSS, Stripe, JWT, QR Code, Node.js, MongoDB, Vercel, Render

- Built a full-stack booking system with real-time seat availability tracking and automated QR-code ticket generation, delivering a complete end-to-end user flow from selection to confirmation.
- Developed a role-based Admin Dashboard supporting movie scheduling, seat management, and booking analytics, with media uploads handled via Cloudinary.
- Secured all API routes using JWT authentication and Bcrypt hashing, implementing role-based access control to separate admin and user permissions at the middleware level.

EXPERIENCE

Frontend Developer

Sep 2025 – Nov 2025

AK Software Solutions (Full-time)

Dehradun, Uttarakhand

- Delivered 3+ client-facing websites, including an e-commerce platform, using HTML, CSS, JavaScript, and Bootstrap, shipping production-ready features within defined timelines.
- Debugged and enhanced UI components in React and Next.js codebases, reducing visual inconsistencies and improving cross-device rendering.
- Refactored shared components to improve reusability and maintainability, speeding up future feature development for the team.

EDUCATION

Master of Computer Applications (MCA) — Uttarakhand University, Dehradun

2023 – 2025

Bachelor of Science (B.Sc) — H.N.B. Garhwal University, Dehradun

HIGHLIGHTS

- Built and deployed 3 production-ready full-stack applications across solo and freelance work, covering authentication, payments, and real-time features.
- Implemented event-driven microservices using Redis Pub/Sub, routed through a centralized API Gateway for independent service deployment.
- Worked across the full cloud stack — Stripe payments, Cloudflare R2 storage, and AWS EC2/RDS infrastructure — from design to production deployment.
